## EXPLANATORY NOTES

**1. Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.

**2. Valuation.** The value of goods imported is the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing on the date at which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

**3. Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are items such as "internal combustion engines and parts" which show a quantity in "number" as well as value. In these items the "number" refers only to the number of substantially complete articles imported, while the value includes also the value of any parts of the article imported. For such items the average value per unit cannot be ascertained.

**4. Coverage.** Statistics of imports include all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series, therefore, includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.

**5. Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the article. A small amount of gold scrap in the form of jewellers' sweepings is also included. Some goods for the use of United States forces stationed at treaty bases in Canada are excluded, as are ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, and Canadian-owned military equipment returned to Canada.

**6. Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. This class of imports is credited to the country in which the goods originated.

**7. Time Periods.** Import statistics for any period include all goods declared on import entries received at the Bureau of Statistics during the calendar period in question.

**8. Abbreviations.** The letters "N.O.P." mean "not otherwise provided for".

## NOTES EXPLICATIVES

**1. Source des données.** La statistique des importations est fondée sur les déclarations des importateurs (documents d'importations) subséquemment vérifiées par les fonctionnaires des douanes.

**2. Évaluation.** La valeur des marchandises importées est la valeur établie pour les besoins des droits de douane. Dans la plupart des cas, elle correspond à la valeur indiquée sur la facture accompagnant les marchandises, valeur exprimée en dollars canadiens au taux d'échange autorisé (habituellement le taux commercial à la date exacte de l'expédition des marchandises au Canada), et à l'exclusion des frais de transport, de l'assurance, des frais de manutention et des taxes. De fait, la valeur des importations est calculée f.à.b. au point d'expédition du pays exportateur.

**3. Unités de quantité.** Le poids, là où il est donné, est le poids net des marchandises, à l'exclusion du poids des emballages exigés pour l'expédition, sauf dans certains cas spéciaux autrement décrits au tarif douanier. L'expression "ton" signifie 2,000 livres et "cwt." 100 livres avoirdupois. Là où d'autres unités de quantité sont employées, les étalons impériaux s'appliquent.

Le présent rapport contient des articles tels que "moteurs à combustion interne et leurs pièces" dont la quantité est indiquée par un "nombre" aussi bien que par la valeur. À cet égard, le "nombre" ne désigne que le nombre des articles à peu près complets importés, tandis que la valeur comprend aussi celle des pièces de l'article importé. Dans ces cas, il est impossible d'établir la valeur moyenne par unité.

**4. Champ d'application.** La statistique des importations comprend toutes les marchandises qui entrent au Canada et que les fonctionnaires de la douane libèrent pour la vente ou l'usage au pays. Elles comprennent donc les marchandises dédouanées dès leur entrée au pays, et les marchandises dédouanées des entrepôts de la douane; mais sont exclues les marchandises placées dans les entrepôts de la douane à leur entrée au pays. L'expression technique "importations pour la consommation" qui est quelquefois employée pour décrire les importations canadiennes ne veut pas dire que toutes les marchandises importées seront de fait consommées au Canada, mais seulement que ces marchandises peuvent être consommées au pays sans autres formalités douanières.

**5. Exclusions.** La statistique des importations ne comprend pas l'or, mais elle comprend les articles en or dont la valeur de la teneur en or est de moins de 80 p. 100 de la valeur de l'article. Une petite quantité de déchets sous la forme de balayures de bijoutier est aussi incluse. Certaines marchandises à l'usage des forces armées américaines occupant, en vertu d'un traité, des bases canadiennes sont exclues, ainsi que les navires de construction et d'immatriculation britanniques importés pour être utilisés au Canada, les navires achetés pour servir au commerce extérieur, les approvisionnements de soutes et de navires achetés par les vaisseaux canadiens à l'étranger, les importations temporaires pour expositions et concours et l'équipement militaire possédé par le Canada et retourné au pays.

**6. Pays de destination.** Les importations sont ordinairement attribuées au pays d'où les marchandises ont été consignées au Canada. Le pays de consignment est le pays d'où viennent les marchandises sans autre interruption de transport que les transbordements inévitables.

Il est fait exception à cette règle dans le cas des marchandises en provenance de l'Amérique centrale ou de l'Amérique du Sud (y compris les Antilles et les Bermudes) et expédiées au Canada des États-Unis. Ce groupe d'importations est attribué au pays d'origine des marchandises.

**7. Périodes de temps.** La statistique des importations pour une période quelconque comprend toutes les marchandises déclarées dans les rapports sur les importations parvenus au Bureau de la statistique durant la période civile observée.

**8. Abréviations.** Les lettres "n.a.é." signifient "non autrement énuméré".

## EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.

2. **Valuation.** The value of goods imported is the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing on the date at which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are items such as "internal combustion engines and parts" which show a quantity in "number" as well as value. In these items the "number" refers only to the number of substantially complete articles imported, while the value includes also the value of any parts of the article imported. For such items the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series, therefore, includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.

5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the article. A small amount of gold scrap in the form of jewellers' sweepings is also included. Some goods for the use of United States forces stationed at treaty bases in Canada are excluded, as are ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, and Canadian-owned military equipment returned to Canada.

6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. This class of imports is credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any period include all goods declared on import entries received at the Bureau of Statistics during the calendar period in question.

8. **Abbreviations.** The letters "N.O.P." mean "not otherwise provided for".

## NOTES EXPLICATIVES

1. **Source des données.** La statistique des importations est fondée sur les déclarations des importateurs (documents d'importations) subséquemment vérifiées par les fonctionnaires des douanes.

2. **Évaluation.** La valeur des marchandises importées est la valeur établie pour les besoins des droits de douane. Dans la plupart des cas, elle correspond à la valeur indiquée sur la facture accompagnant les marchandises, valeur exprimée en dollars canadiens au taux d'échange autorisé (habituellement le taux commercial à la date exacte de l'expédition des marchandises au Canada), et à l'exclusion des frais de transport, de l'assurance, des frais de manutention et des taxes. De fait, la valeur des importations est calculée f.à.b. au point d'expédition du pays exportateur.

3. **Unités de quantité.** Le poids, là où il est donné, est le poids net des marchandises, à l'exclusion du poids des emballages exigés pour l'expédition, sauf dans certains cas spéciaux autrement décrits au tarif douanier. L'expression "ton" signifie 2,000 livres et "cwt." 100 livres avoirdupois. Là où d'autres unités de quantité sont employées, les étalons impériaux s'appliquent.

Le présent rapport contient des articles tels que "moteurs à combustion interne et leurs pièces" dont la quantité est indiquée par un "nombre" aussi bien que par la valeur. À cet égard, le "nombre" ne désigne que le nombre des articles à peu près complets importés, tandis que la valeur comprend aussi celle des pièces de l'article importé. Dans ces cas, il est impossible d'établir la valeur moyenne par unité.

4. **Champ d'application.** La statistique des importations comprend toutes les marchandises qui entrent au Canada et que les fonctionnaires de la douane libèrent pour la vente ou l'usage au pays. Elles comprennent donc les marchandises dédouanées dès leur entrée au pays, et les marchandises dédouanées des entrepôts de la douane; mais sont exclues les marchandises placées dans les entrepôts de la douane à leur entrée au pays. L'expression technique "importations pour la consommation" qui est quelquefois employée pour décrire les importations canadiennes ne veut pas dire que toutes les marchandises importées seront de fait consommées au Canada, mais seulement que ces marchandises peuvent être consommées au pays sans autres formalités douanières.

5. **Exclusions.** La statistique des importations ne comprend pas l'or, mais elle comprend les articles en or dont la valeur de la teneur en or est de moins de 80 p. 100 de la valeur de l'article. Une petite quantité de déchets sous la forme de balayures de bijoutier est aussi incluse. Certaines marchandises à l'usage des forces armées américaines occupant, en vertu d'un traité, des bases canadiennes sont exclues, ainsi que les navires de construction et d'immatriculation britanniques importés pour être utilisés au Canada, les navires achetés pour servir au commerce extérieur, les approvisionnements de soutes et de navires achetés par les vaisseaux canadiens à l'étranger, les importations temporaires pour expositions et concours et l'équipement militaire possédé par le Canada et retourné au pays.

6. **Pays de destination.** Les importations sont ordinairement attribuées au pays d'où les marchandises ont été consignées au Canada. Le pays de consignment est le pays d'où viennent les marchandises sans autre interruption de transport que les transbordements inévitables.

Il est fait exception à cette règle dans le cas des marchandises en provenance de l'Amérique centrale ou de l'Amérique du Sud (y compris les Antilles et les Bermudes) et expédiées au Canada des États-Unis. Ce groupe d'importations est attribué au pays d'origine des marchandises.

7. **Périodes de temps.** La statistique des importations pour une période quelconque comprend toutes les marchandises déclarées dans les rapports sur les importations parvenus au Bureau de la statistique durant la période civile observée.

8. **Abbréviations.** Les lettres "n.a.é." signifient "non autrement énuméré".
